<b>Office Action Summary</b>	<b>Application No.</b> 10/699,110	<b>Applicant(s)</b> ZELDIS, JEROME B.	
	<b>Examiner</b> Zohreh A. Fay	<b>Art Unit</b> 1618	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 02 July 2007.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Claims 1-7 and 18-19 are presented for examination.

The amendments and remarks filed on July 2, 2007 have been received and entered.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 1618

Claims 1-7, 18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Muller et al. (U.S. Patent 6,020,358) in view of Tobinick (U.S. Patent 6,428,787) and D'Amato (U.S. Patent 6,235,756).

Muller et al. teach the use of the claimed compounds as TNF alpha reducing compounds. See the abstract, column 1, lines 1-10 and columns 5-8. Tobinick teaches the use of TNF alpha blockers or antagonists for the treatment of macular disorders, such as macular degeneration. See Column 1, lines 10-25, column 2 lines 25-39 and claim 6. D'Amato teaches the use of the claimed secondary components, such as thalidomide for the treatment of angiogenic disorders, such as macular degeneration. See the abstract and column 5, lines 10-30. The primary reference differs from the claimed invention in the use of the claimed compound for the treatment of macular degeneration, and the addition of the secondary angiogenic compounds, such as thalidomide. It would have been obvious to a person skilled in the art to use the claimed compound individually or in combination with a secondary angiogenic compound for the treatment of macular degeneration, motivated by the teachings of Tobinick and D'Amato, which teach the use of TNF alpha inhibitors, and also the use of the secondary components, such as thalidomide for the treatment of macular degeneration.

One skilled in the art would have been motivated to combine the teachings of the above reference, since one relates to the use of the claimed compound having TNF alpha reducing effect, the other relates to the compounds having TNF inhibitory effect for the treatment of macular degeneration and the third reference teaches the use of the claimed secondary components, such as thalidomide for the treatment of macular

degeneration as old. Applicant has presented no evidence to establish the unexpected or unobvious nature of the claimed invention, and as such, claims 1-7, 18 and 19 are properly rejected under 35 U.S.C. 103.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zohreh A. Fay whose telephone number is (571) 272-0573. The examiner can normally be reached on Monday to Friday 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Hartley can be reached on (571) 272-0616. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
